# your\_World

## Your wireless sound network carries your beats everywhere.

your\_World consists of two transmitters (your\_Stick/your\_Dock), two receivers with IR remote (your\_Solo/your\_Duo) and one subwoofer (your\_Sub). Combine your\_World however you want and add to it whenever you want.

### Choice of 3 channels

#### Simple arrangement of transmitter and receiver

- ») 3 channels (red/green/blue) for maximum flexibility
- ») Easy channel selection on both transmitter and receiver
- ») One transmitter can control multiple receivers
- ») One receiver can be controlled by multiple transmitters
- ») Up to 3 transmitters can be integrated into one network

### 3 listening zones / Roomselect

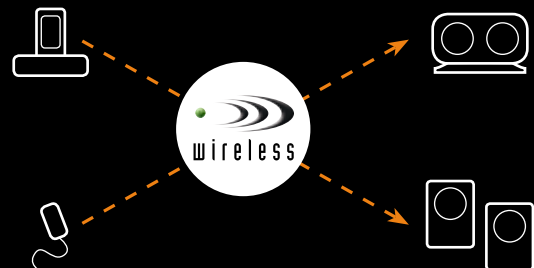

#### System extension and Multiroom

- ») Room selector switch for 3 different listening zones
- ») System can be easily expanded at any time
- ») Multiple receivers can be integrated as desired
- ») Multiroom operation, central loudspeaker control possible

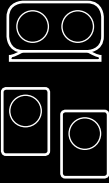

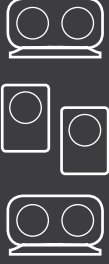

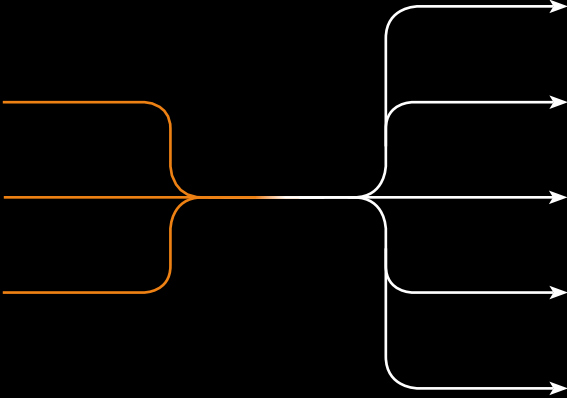

### Radio transmission

#### Strong, interference-free radio transmission

- ») Range of up to 20 metres
- ») Central source adjustment on individual loudspeakers possible

# Your options

	Transmitter		Receiver	
Single				1 Transmitter + 1 Receiver
Double				2 Transmitter + 1 Receiver or 1 Transmitter + 2 Receiver
Triple				3 Transmitter + 1 Receiver or 1 Transmitter + 3 Receiver
Multiple				1-3 Transmitter + As many receivers as you want
